DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-13, drawn to an applicator head having a body portion, a nozzle plate and at least one material delivery system, classified in class 239, subclass 556.
- II. Claims 14-46, drawn to a sound damping composition comprises n-butyl, and at least about 0.5% by weight of low-density glass bead filler, classified in class 524.

The inventions are distinct, each from the other because of the following reasons:

Inventions drawn to Category I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case, Claims 1-13 drawn to an applicator head having a body portion, a nozzle plate and at least one material delivery system and Claims 14-46 drawn to a sound damping composition comprises n-butyl, and at least about 0.5% by weight of a low-density glass bead filler of which are two different inventions.
